

## IP68 RF Water proof

IP 68 series are being used in IP 68 Waterproof devices. The outstanding waterproof function, which can provide quick and cost-effective solutions in outdoor harsh environment of RF needs. The devices can be adopted from cable OD of 0.81mm ~10mm, with PVC jacket or Telfon cable. They are mainly on GSM / 3G / 4G / WiFi / WLAN / GPS relevant waterproof designs.

### Features

1. Quick Type: Anti-UV
2. Panel Type: Anti-UV / Acid / Alkali
3. Antenna: Anti-UV

### Applications

- Water tank content/Water level monitoring. Water/Electric meter, and Pollution prevention monitoring programmes
- Renewable energy power transmission projects
- Energy conservation managements
- Indoor and outdoor solutions in LED market
- Industrial Automation testing and monitoring programmes
- High-speed broadband transmission and Telecom system integration solutions
- Technology development solutions in severe environments based on communication industries.
- The wild animals and plants tracking and monitoring programmes
- GSM / 3G / 4G / WiFi / WLAN / GPS relevant waterproof designs.
